

Webinar:

The use of unmanned aerial systems (“drones”) to characterize the radiological situation in the aftermath of an accident

23rd September 2021, 15:00

- ▶ NERIS is a European platform on preparedness for nuclear and radiological emergency response and recovery, founded in June 2010.
- ▶ 66 institutions (from 27 different countries) are currently members of the NERIS platform
- ▶ The mission of the NERIS Platform is to establish a **forum for dialogue and methodological development** between European organisations and associations involved in the preparation and management of **nuclear and radiological emergencies and recovery**.
- ▶ NERIS Strategic Research Agenda:
 1. Challenges in **radiological impact assessment** during all phases of nuclear and radiological events
